## Major Features

(See the back page for a complete list of features)

- **User friendly content creation** - pages are created in an editor which resembles creating documents in a word processor (such as Microsoft Word). Content can be previewed before publishing, and a huge range of formatting options are available. Images and photos from your image library can easily be inserted, positioned and resized quickly and easily into Pages can then be attached to menu items on your site.

Sample page being edited in the SportzVault page editor

- **Multi level cascading navigation** - define your own site menu structure, and attach your own pages, uploaded files (such as .doc, .xls, .pdf), or link to external web sites. The unique multi level menu control means that your site can be structured the way you want, and everything is available from the menu. Our menu editor easily allows menu items to be created, attached to content, and even moved around by dragging and dropping.
- **Advanced support for News & Events**. Creating these items is even easier than creating a content page. These types of items are assigned dates, and automatically expire (and are moved to an archive area) after this time.

Over 250 sporting clubs are now using a SportzVault website! Websites start from around \$10 per month.

SportzVault (known as CricketVault for cricket clubs) is a powerful, user friendly "build it yourself" web site package that allows sporting clubs and associations to build and maintain an attractive functional online presence. It has been designed from the ground up with the needs of sporting clubs and associations in mind. No specialist web or programming experience is necessary - building and maintaining pages is as simple as editing a document in a word processor.

This means more users can be given access to update the site to spread the load and avoid the reliance on just one person. What's more it's a fully hosted service so there is no software to install and no ISP hosting accounts required.

SportzVault also provides many built in features that are particularly relevant to sports organisations such as full integration to the ResultsVault competition and participant management system (see below), contact pages, cascading (ie association news can be displayed on the club website) and automatically generated club and venue pages.

One of the most attractive features of a SportzVault website is the ability to control and customise the look of the site to suit your club. Site colors and layout can be very quickly changed via the online customization tool without the need for creating HTML or CSS templates.

### About ResultsVault

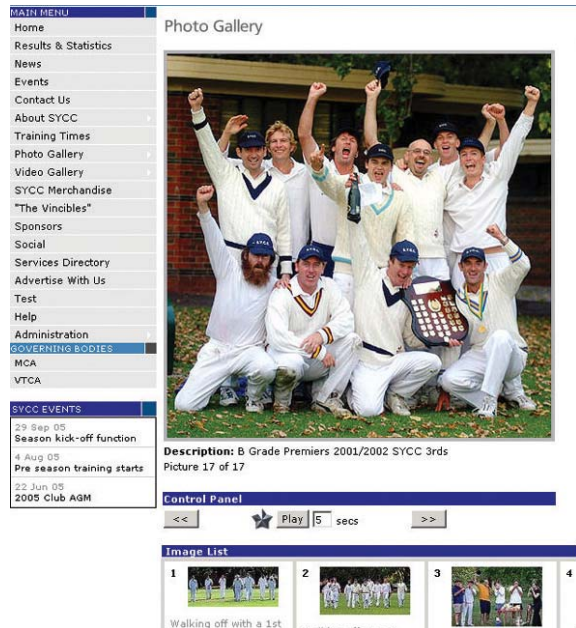

ResultsVault is one of the leading online competition and participant management solutions available which simplifies the entire management of your sport. ResultsVault solutions are best of breed, provide a great user experience, reduce reliance on manual processing, and ultimately pay for themselves in time and cost savings.

# Websites for Sports Clubs

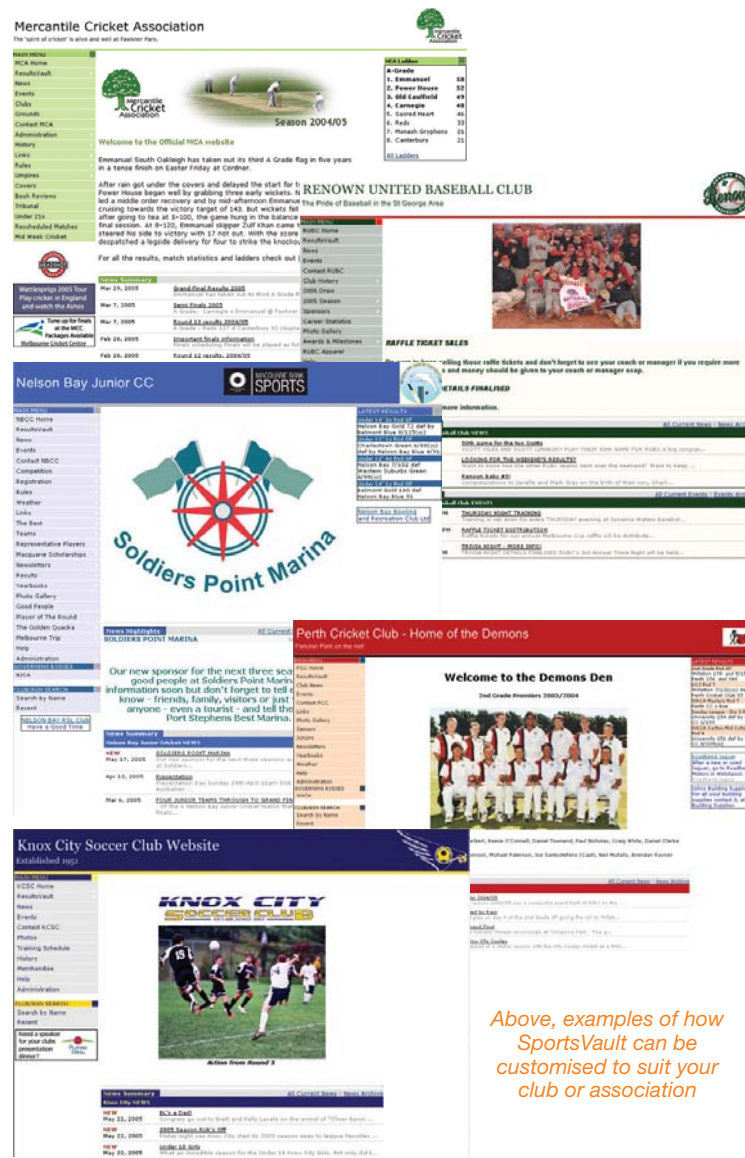

- **Support for any type of stand alone document to be uploaded** - eg doc, xls, gif, jpg, mpeg etc. These are logically arranged in image and document libraries, with full file manager control (eg ability to delete, rename etc). To save time, multiple documents and images can be uploaded in a single zip file which is then automatically unzipped into the relevant library.
- **Advanced support for photo galleries/slideshows.** Organise your photos in one or more 'slideshow galleries' where photos can be selected from automatically generated thumbnail images. Slideshow can be created in a matter of seconds and you can also add captions to each photo.

Sample photo gallery which are quick and easy to create

- **Advertising module** - Adverts can be placed easily on the site in a number of positions down the left, right or top of each page. Adverts can be images with links to external sites or you can create your own text based adverts. Check the effectiveness of your ads, and how often they are clicked. A great way to increase revenues and increase exposure for existing sponsors.
- **Customise the site to your own colours.** Most elements in the site can be customised and there are a large number of display options and preferences. Changes can be previewed before being committed. The colour scheme of the site can be customised quickly and easily without the need to upload templates or CSS files. More advanced users can customise HTML tags for improved search engine listings.

- **Web hosting included and** - support for club domain names (eg www.yourclub.com or yourclub.sportzvault.com) No additional fees for site traffic!
- **Full integration with ResultsVault** (if ResultsVault account held), All results, fixtures, ladders, statistical reports etc are displayed within your site.
- **'Inheritance model'** - clubs can easily access association and state news and events
- **Built in pages** - There are many built in pages specifically for sports organisations including contact information, office bearers, club and ground lists.

Above, examples of how SportsVault can be customised to suit your club or association
